# Children Love to learn

# @ Frolic EDU LAB

## Frolic Edu lab

### Kindergarten to Class 5

Let's create a space that gives freedom to explore, express and experience without burden of expectations and fear of making mistakes.

Frolic™ Kids Edu Labs

## Benefits of “Frolic Edu labs (FEL)”

1. **Enhanced engagement:** Frolic Edu Labs offer a more interactive and engaging learning experience for students of K.G. to class 5 compared to traditional rote learning. This can capture their attention for longer periods and increase their overall interest in learning.

2. **Personalised learning:** Frolic Edu Labs allow for individualised learning experiences, as children can learn at their own pace and explore topics that interest them. FEL provide virtual experiences, allowing children to engage with learning games and multimedia activities, thus creating a more personalised and meaningful learning experience.

3. **Stimulates critical thinking:** FEL, the self learning methods, encourage the development of critical thinking skills. Children are challenged to analyse, problem-solve, and make decisions, fostering intellectual growth and creativity.

4. **Better retention and comprehension:** FEL has Digital multimedia formats, such as, images and interactive exercises, can help improve memory retention and comprehension of concepts.

5. **Development of technological skills:** Incorporating FEL at young age help preschool children become familiar with technology and develop basic tech skills. These skills are essential in today's digitally driven world and can equip children with a solid foundation for future learning and employment opportunities.

6. **Flexibility and accessibility:** FEL offers flexibility in terms of time and location. Children can access our Edu Lab from nearby location and at convenient time.

7. **Collaboration and social skills:** FEL facilitates collaborative activities, encouraging children to work together and develop their social skills.

8. **Motivation and enjoyment:** FEL, with its interactive nature and mind friendly elements, can motivate children to participate actively and enjoy the learning process.

* We have pedagogical and technological collaboration with “Manovikas Mulyankan Sanstha” who has developed Edu Labs platform that includes English Lab and Maths Lab. The course and content of this brochure is created by Manovikas Mulyankan Sanstha. © Manovikas Mulyankan Sanstha, March 2025.

## Frolic English Lab*:

You will be glad to know our products and services can fuel your efforts and multiply your productivity, in terms of students' scholastic, social, emotional, and cognitive development. You will be thrilled to explore our offerings that include high-quality interactive English Lab software. We understand the importance of linguistic and communication skill in shaping a child's overall development. With extensive experience in the field and a team of dedicated education professionals, our educational associate has crafted an outstanding English Lab program that focuses on holistic learning through digital interactive activities.

## Syllabus:

Our meticulously designed English lab syllabus is tailored to meet the diverse needs of primary school children. It encompasses all essential areas of linguistic and communication skill development, including social, emotional and cognitive skills. The highlights of our English Lab syllabus are as following ;

- Development of basic vocabulary of more than 8000 words with their applications in sentence formation.
- More than 200 small compositions and information on our environment and society.
- More than 150 small stories to develop listening and reading comprehension.
- Listening and speaking practice of more than 25000 sentences with digital assessment and periodic reports.
- Practice of essays, elocution, debates, plays and role plays on many cultural and political topics to develop effective communication reinforced by advanced vocabulary.

## Mentoring mentors:

We believe that well-groomed teachers are crucial in providing top-notch education to young children. Our comprehensive mentoring program equips teachers with effective teaching strategies, child psychology insights, classroom management techniques, and child-centred assessment methods. Through workshops and webinars, our experienced mentors ensure that teachers are well-prepared to deliver the curriculum and create a nurturing learning environment.

Frolic™ Kids Edu Labs

## Detailed Syllabus English Lab:

Following is the syllabus Frolic English Lab for Jr kindergarten to class 5 students. We are associated with “Pabulum Eduhub (OPC) Pvt Ltd” to bring this miraculous course of “Englisk Lab” and “Maths Lab” to help the children acquire English fluency at early stage of education. Moreover, we have pedagogical support from “Manovikas Mulyankan Sanstha”, who has vast experience of pedagogical research and human resource development.

### Echelon 01: Begin to read

#### Module 01 : Sight Words - (D.I.E.L.) + 2 Workbooks

Sight words are words that children learn to recognise by sight, rather than sounding them out letter by letter. These words appear most frequently in reading materials. Learning sight words improves reading speed and comprehension too.

#### Module 02 : Phonemes and Grapheme - 44 Phonemes (D.I.E.L.) 01 work book

A phoneme is the smallest unit of sound in a language, while a grapheme is the smallest unit in a writing system that represents a sound—this can be a letter or a group of letters. In simple terms, phonemes are the sounds we make when we speak, and graphemes are the symbols we use to write down those sounds. Teaching children about phonemes and graphemes is crucial for several reasons:

1. Foundations for Reading and Writing
2. Spelling and Pronunciation
3. Language Awareness and Cognitive Skills
4. Early Intervention and Support

### Echelon 02: Exploring the world around

#### Module 01 : My world in my words - (D.I.E.L.) + 2 Workbooks

Small descriptions of surrounding objects and events can be incredibly impactful for children in building vocabulary and developing a love for language. Here's why:

1. Word Association
2. Contextual Learning
3. Curiosity and Engagement
4. Imitative Learning
5. Emotional Connection

#### Module 02 : My early encyclopaedia - (D.I.E.L.) + 02 books & 4 workbooks

Encyclopaedia provides a wealth of knowledge that is presented in a way that is both engaging and educational. They empower young readers by building their vocabulary, enhancing comprehension, and encouraging a love for learning that spans beyond the classroom. This, in turn, lays a robust foundation for more advanced linguistic skills as children grow.

### Echelon 03: The world of imagination - (D.I.E.L.) + 2 books & 2 workbooks (200 stories)

### Echelon 04: Grammar and composition - (D.I.E.L.) + 4 workbooks

The students can acquire fluency in English with help of “Digital Interactive English lab” (D.I.E.L.) and Pabulum® English Lab workbooks within 3 to 5 years. D.I.E.L. has many interactive exercises that give lots of listening and speaking practices. It is advisable to aquire D.I.E.L. subscription along with purchase of workbooks to acquire English fluency faster, easier and enjoy the process. (We keep upgrading our syllabus and books regularly, so above information can be altered or upgraded without any prior notice, please refer the latest syllabus and list of books and workbooks, at time of enrollment.)

Pabulum® is registered trademark of manovikas mulyankan sanstha.

## Benefits of our “English Lab”

**1. Language Development:** Our English lab application and workbooks allow Indian English medium school children to learn English in a more interactive and contextual way, aiding in their language development. They are exposed to authentic English language usage through videos, audio clips, and interactive activities, which can improve their speaking, listening, and comprehension skills.

**2. Active Engagement:** Traditional learning by rote often promotes passive learning, where children simply repeat information without truly understanding it. On the other hand, our interactive English lab application encourages students’ active engagement and participation. Students can interact with the content, solve problems, and explore different concepts, which enhances their critical thinking and problem-solving abilities.

**3. Multi-sensory Learning:** Our English Lab course leverages creative satisfaction and sense of self achievement. The multimedia features, such as colourful visuals, animations with sound effects, providing a multi-sensory learning experience for children. This approach caters to different learning styles and helps children with a different mother tongue than English to understand and retain information better.

**4. Personalised Learning:** With English Lab App and “Pabulum® Workbooks, children can progress at their own pace and receive personalised feedback. They can repeat activities and lessons until they grasp the concepts, which is not possible in a traditional rote learning setup. This individualised learning experience enables non-English mother tongue speaking children to build their English language skills gradually and confidently.

**5. Real-world Connections:** Experiential learning exposes children to real-world scenarios and practical experiences. They can engage in hands-on activities, experiments, and role plays to understand concepts better. This approach not only enhances their understanding of English but also provides a holistic learning experience, where they can connect English language skills to real-life situations.

**6. Motivation and Interest:** Our English Lab platform incorporate level wise interactive exercises, such as basic, intermediate and advanced along with progress tracking, which can motivate children to actively participate in their learning process. Our English Lab also sparks curiosity and interest through interactive and immersive experiences, making learning more enjoyable and engaging for non-English speaking kids.

In summary, Our English Lab platform with interactive exercises offer several advantages over traditional rote learning for non-English speaking Indian English medium children. They enhance language development, active engagement, multi-sensory learning, personalised learning, real-world connections, motivation, and cultural awareness, ultimately providing a more effective and fulfilling learning experience.

Frolic™ Kids Edu Labs

## Detailed Syllabus Maths Lab:

Following is the syllabus Frolic Math Lab for Jr kindergarten to class 5 students.

### Echelon 01: Numerical counting & calculations

Module 01 : Numbers & digits - 01 digit, addition/subtraction - 01 digit. Numbers & decimal system - 02 digits, addition/subtraction - 02 digits, calculations with abacus. (2 workbooks)

Module 02 : Forward and backward counting - up to 03 digits (Including skip counting), addition/subtraction with abacus and mental calculations up to 3 digits. Introducing the concept of multiplication and division as repeated addition and subtraction. Multiplication tables. Complex addition-subtraction & grouping up to 03 digits with abacus. (3 Workbooks)

Module 04: Place value and ordering numbers - 4 & 5 digits, Division - simple and with remainders. Introduction of fraction. Proper and improper fraction. Comparing and ordering fractions. (2 workbooks)

Module 05: Formation of numbers and comparing them up to 100000. Larger multiplication and division. Introduction of decimal fractions & mixed fractions. Addition and subtraction of fractions and decimal fractions. (2 workbooks)

### Echelon 02: Numerical Applications - (Includes pragmatic problems and projects)

Module 01: Understanding and measuring Time, length, weight and capacity. Understanding the concept of money and transactions. (2 workbooks & 1 project book)

Module 02: Understanding ratio and proportion. Understanding the concept of percentage. Data handling and representing data through graphs. (2 workbook & 1 project book)

### Echelon 03: Geometry - (Includes pragmatic problems and projects)

Module 01: Identifying and classifying 2D and 3D shapes. Understanding angles, lines and basic geometrical concepts. Measuring area, perimeter and solving pragmatic problems. (2 workbooks & 1 project book)

Our digital Math lab combined with abacus training can be a game-changer for kids aged 4 to 11 years. Here's why:

## Cognitive & Academic Benefits

Boosts Brain Development – Abacus training engages both hemispheres of the brain, enhancing memory, concentration, and problem-solving skills.
Improves Numerical Fluency – Kids develop a strong foundation in numbers, making advanced math concepts easier to grasp.
Enhances Visualization Skills – The abacus helps children transition from physical bead movement to mental visualisation, strengthening their ability to perform calculations mentally.
Balances Brain Usage – While the left brain handles logic and calculations, the right brain focuses on creativity and visualization, leading to holistic cognitive development.

## Confidence & Life Skills

**Boosts Self-Esteem** – Mastering mental math builds confidence and encourages kids to take on new challenges.
**Improves Focus & Concentration** – The structured approach of abacus training sharpens attention span and accuracy.
**Develops Problem-Solving Abilities** – Mental math encourages critical thinking, helping kids apply their skills in real-life situations like shopping or budgeting.

## Why Digital Math Labs Make It Even Better

**Interactive Learning** – Digital platforms make math engaging through images, animations, and interactive exercises.
**Personalised Progress Tracking** – Kids can learn at their own pace with adaptive learning tools.
**Convenience & Accessibility** – Learning can happen anytime, anywhere, making math practice more consistent.
